18 April 67

MEMORANDUM FOR : Deputy for Operations,
Office of Special Activities

25X1A

SUBJECT : Location of Additional Weapon for [REDACTED]

REFERENCES : A. [REDACTED] MSG 2097 (IN 97892)
B. [REDACTED] MSG 1968 (OUT 01224)
C. [REDACTED] MSG 2221 (IN 98755)

25X1A

1. Information received from [REDACTED] Life Support Section indicates that the most ideal location for the weapon selected by INTEL/O/OSA is on the upper inside position of the flying boot. The thigh region of the coverall was determined to be inadvisable because of interference with the seat and pilot mobility and because the coverall would not provide an adequate support for attaching a holster. [REDACTED] informed me that holsters for this weapon can be made and attached to the flying boot locally at Detachment H.

25X1A

2. It is therefore suggested that INTEL Div/O/OSA supply the weapons selected to Detachment H and direct them to have holsters locally fabricated and attached to the inside upper portion of the flying boot. It would be desirable to have photographs made of this installation and forwarded to Headquarters for evaluation and future reference.
